# CONTRACT AGENT

SYNTHETIC DEMO DATA Model: anthropic/claude-sonnet-5-5

## Ask about a contract

**Imagine one of these contracts comes up for renewal next month. Ask what you would want to know before deciding, in your own words.**

10 invented contracts shaped like ours: order forms, master agreements, two renewals. Contract documents only: no usage data, invoices or emails.

YOUR QUESTION

if we are going to be stuck or not with the company after 3 years

Ask Enter to ask, Shift+Enter for a new line

You didn't say which contract you mean, so this covers all of them. In short, you can get stuck with some vendors if you miss a notice deadline, and with others you can't. None of the terms I found let you cancel early for convenience. The only early exit they give is for an uncured material breach, e.g. `SYN-05-terms.md#8. Term and Termination`.

**Auto-renews, so you can get stuck unless you give notice in time**

- **Vendor05:** Each order renews for a period equal to its current term unless notice is given at least 90 days before the term ends `SYN-05-terms.md#8. Term and Termination`. The renewal order runs 1 July 2026 to 30 June 2028 (24 months) `SYN-05-renewal.md#Renewal Term`. If you miss the deadline, you would renew for another 24 months. By my calculation, 90 days before 30 June 2028 is about 1 April 2028.
- **Vendor10:** The renewal form says the subscription renews for successive 12-month periods unless the Customer gives notice at least 90 days before the term ends `SYN-10-renewal.md#Purchase Terms`. The renewal form prevails over the Agreement `SYN-10-renewal.md#Renewal Summary`. The renewal term ends 30 November 2027 `SYN-10-renewal.md#Renewal Term`. By my calculation, notice would be due by about 1 September 2027.
- **Vendor04:** The agreement renews for successive 12-month periods, with 60 days' notice `SYN-04-terms.md#8. Term and Termination`. The order form overrides this and requires 90 days' notice `SYN-04-order.md#Terms`. I didn't find this order's term dates.
- **Vendor01:** Each order renews for a period equal to its current term, with 90 days' notice `SYN-01-terms.md#8. Term and Termination`. I didn't find this order's term dates.
- **Vendor07:** Each subscription renews for a further 12 months, with 30 days' notice `SYN-07-terms.md#8. Term and Termination`. I didn't find this order's term dates.

**No automatic renewal, so you are not locked in beyond the term**

- **Vendor06:** The subscription does not renew automatically, and any renewal needs a new signed order form `SYN-06-order.md#Terms`. The term ends 31 August 2028 `SYN-06-order.md#Subscription Term`.
- **Vendor09:** The subscription ends at the end of its term and does not renew automatically `SYN-09-terms.md#8. Term and Termination`. I didn't find the order's dates.
- **Vendor02:** Renewal is only possible by a new agreement signed by both parties `SYN-02-terms.md#8. Term and Termination`. The term starts 1 March 2026 and runs 36 months `SYN-02-order.md#Subscription Term`. By my calculation, it ends 28 February 2029.

**Can't tell, because the governing terms are missing**

- **Vendor03:** The order runs 1 February 2026 to 31 January 2027 `SYN-03-order.md#Subscription Term`. It is governed by the Vendor's online Terms of Service, which are not attached `SYN-03-order.md#Terms`. Without them I can't say whether it renews.
- **Vendor08:** The services start 1 November 2025 and continue for 36 months `SYN-08-order.md#Subscription Term`. By my calculation, that ends 31 October 2028. The order relies on standard terms published online that are not attached `SYN-08-order.md#Terms`. I can't tell whether it renews.
- For both, ask the vendor for the last signed copy of its online terms.

If you tell me which vendor you mean, I can narrow this down.
